

WOMEN IN MANUFACTURING DAY

APRIL 26, 2023

9:00-1:30

AGENDA

**THANK YOU TO
OUR PARTICIPATING
SPONSOR**

HIGH SCHOOL GIRLS ARE INVITED TO EXPLORE THE WORLD OF MANUFACTURING.

Less than 30% of the US manufacturing workforce is female. That means the sector is losing out on utilizing the talents and skills of women, and women are losing the opportunity for some great, family-supporting careers.

The main goal of this event is to introduce high school girls to careers in manufacturing and other skilled trades; inspire and empower them into considering non-traditional careers; and show them that they can break ceilings.

LOCATION: Johnsonburg Community Center (JCC)

- | | |
|-------------|--|
| 9:00 | Arrival |
| 9:10 | Welcome/Introduction to Domtar |
